EXIT Series

Description

The Red Color Wet List Exit Light is a highly functional emergency light that is suitable for wet locations. Its injection-molded thermoplastic ABS housing has a UL 94V-0 flame rating, making it safe for use in emergencies. It can be mounted on walls or a universal J box mounting pattern. This light operates at 120V/277VAC dual voltage and comes with a built-in 3.6V 500mAh Nickel cadmium battery, providing a minimum of 90 minutes of emergency operation. The light also includes a test switch and charge indicator, and it takes a maximum of 24 hours to fully recharge.
