

CASE STUDY

Durham-based Valassis, a division of VERICAST.

Recent News

VERICAST's Valassis Printing Division is located in Durham's Research Triangle Park. In this facility, three 3-story Roland printing presses can be found. 24 hours a day, 7 days a week, printing is available.

RESULTS

The John Riley Group upgraded the facility's LED lighting. Six-man crews used articulating lifts and narrow-base scissor lifts to replace approximately 800 fixtures, most of which were in the production and production support areas. Four weeks were spent on the project.

"Thank you to the John Riley Group for completing our LED lighting retrofit. John gained my trust from the very beginning, and I could not have asked for a better partner on this project. Replacing over 800 lights in a 180,000 sq ft manufacturing environment and never once interrupt production was truly astounding! Your recommendations on lighting led to an immediate cost savings with a reduction in energy usage and eliminated maintenance involved with old fluorescent lights. The LED retrofit has given our facility a much cleaner, brighter light and eliminated a lot of shadows creating a safer environment. I would highly recommend The John Riley Group to anyone looking to enhance their facility lighting."
