### Features

The GL2 series LED grow light features a full-spectrum light, similar to the sun to provide high efficient lighting from-seeding to harvest. It is an ideal choice for hobbyists and commercial growers. GL2 series is specially designed for commercial indoor horizontal and vertical growing environments, saving electric cost, releasing maximum PAR efficiency & uniform lighting distribution with great yield. The 3 times folding structure design makes the growing light more flexible, smallest package, and more simple to install, just plug and play. Single knob+RJ14 port for dimmer and timer. Multi-light connection with unified dimming is especially beneficial for large areas of indoor growing and commercial planting.
